

FARHAN WAHYUDI

Information Systems graduate with a strong focus on full-stack web development and a proven track record in building web applications using Laravel, PHP, and MySQL. Demonstrated technical expertise through freelance development work, where he accelerated project delivery using AI-assisted development tools, and gained structured professional experience as a Frontend Developer Intern at VINIX7. Applied academic knowledge through significant projects including a comprehensive job marketplace platform and a Geographic Information System for community service, showcasing leadership in technical implementation and code architecture improvement.

Jambi, Indonesia | hello@frhnwahyudi.xyz | +6281247506528 | <https://www.linkedin.com/in/frhnwahyudi>

EDUCATION BACKGROUND

Dinamika Bangsa University | Jambi, Indonesia

Bachelor's in Information Systems | GPA: 3.73/4.00 | Aug, 2022 - Jun, 2026

Maintained a high GPA while completing internships.

PROFESSIONAL EXPERIENCE

Freelance | Jambi, Indonesia (Hybrid)

Full-stack Developer & System Analyst | Jan, 2024 - Present

- Designed and developed full-stack web applications using Laravel, PHP, and MySQL, including frontend interfaces, RESTful APIs, and business logic for clients working on academic research and thesis projects.
- Accelerated development by integrating GitHub Copilot self agents built using Deepseek API and LangGraph for prompt engineering, code generation, debugging, and architectural improvements to enhance development efficiency.
- Designed relational database schemas and optimized SQL queries to ensure high data integrity and performance, supporting scalable application architecture and efficient data processing.
- Created comprehensive UML diagrams, flowcharts, and technical documentation to support client requirements analysis, system maintainability, and project delivery standards.

VINIX7 | Jambi, Indonesia (Remote)

Frontend Developer Intern | Aug, 2025 - Dec, 2025

- Built responsive frontend interfaces by converting Figma designs into clean HTML, CSS, and JavaScript, ensuring cross-platform compatibility and user-friendly interface implementation.
- Collaborated with a team of 3-4 members to deliver frontend applications on schedule, maintaining consistent code quality and project timeline adherence throughout the development process.
- Contributed to the SkillBridge Global project as an intern capstone project, which later evolved into a full-stack undergraduate thesis, demonstrating continuity between professional experience and academic work.

PROJECT

Personal Portfolio Webpage | Individual Development Project

Frontend Development Project | Nov, 2024 - Present

- Designed and deployed a fully responsive landing page using HTML, CSS, and JavaScript, which later redesigned and modernized using Next.js, and Shadcn UI showcasing web development portfolio and creating a professional online presence.

- Implemented modern web design principles and responsive layouts to ensure optimal user experience across different devices and screen sizes, demonstrating attention to user interface best practices.
- Published the portfolio at <https://frhnwahyudi.xyz> to serve as a professional showcase of technical capabilities and project documentation for potential clients and employers.

GIS: Beauty Clinic Mapping in Jambi City | Academic Research Project

Geographic Information System Development | Apr, 2025 - Present

- Built a web-based Geographic Information System using Laravel and Leaflet.js to solve public difficulty in finding authorized beauty clinics, addressing a real community need through technical solution development.
- Implemented secure User-Generated Content system with admin approval workflow, ensuring content quality control and data reliability while enabling community participation in system content.
- Delivered a functional mapping platform that helped people to easily search the updated beauty clinics and demonstrated practical application of GIS technology for public service improvement in <https://beautyclinics.frhnwahyudi.xyz>.

SkillBridge Global – Job E-Marketplace & Escrow Platform | Undergraduate Thesis Project

Full-stack Development Project | Sep, 2025 - Present

- Led the full-stack development of a comprehensive Job E-Marketplace & Escrow Platform using Laravel and MySQL as an undergraduate thesis project, demonstrating advanced web development capabilities and project leadership.
- Refactored backend architecture from Fat Controllers to Service-Repository Pattern to improve code quality and maintainability, utilizing GitHub Copilot assistance for architectural optimization and cleaner code structure.
- Currently preparing the application for production deployment using Docker, Laravel Cloud, Vue.js for enhanced Single Page Application performance and scalable deployment infrastructure.

SKILLS & LANGUAGES

Skills: Laravel, PHP, RESTful APIs, OOP, HTML5, CSS3, JavaScript, Leaflet.js, MySQL, PostgreSQL, GitHub Copilot, Prompt Engineering, Git, UML Diagrams, Flowcharts, Technical Documentation, Docker, Tailwind CSS, Vue.js, LangGraph

Languages: Indonesian (Native), English (Conversational)
